How do you predict your future?

There are numerous ways to tell something about the future. People have developed their ways to do so since the beginning of mankind. Many of these ways however have fallen into disuse. Either because it has been forgotten how to interpret these 'oracles', or just because some ways have become old-fashioned. Fortune-telling or divination is used a lot in these times. Think about Tarot, Astrology and Palmistry. More often than not people who use these methods are not very critical about the results. They have themselves told some outcome and this is used or forgotten. The most important part, the creation of the symbol and the interpretation are often left to 'specialists', while there is so much to win by DIY-divination.

That's what this project is all about: create a system of divination which fits you as a suit, which belongs to you and your personal fascinations. Re-invent an old method or develop your own one. Think about how to ask your question, how to obtain a result, and how to interpret it in regard to your question.

Document the process and/or the outcome and send it to the Mededeler (Communicator) for documentation both on the mancy-website and on paper.

mail@mededeler.nl (also use this mail address to ask for the snail mail address when necessary; the snail mail address is vulnerable to change, that's why I don't mention it here)
